

REMARKS

By this Amendment, claims 1-29 have been cancelled without prejudice or disclaimer. New claims 30-56 have been added, ample support being available in the specification. No new matter has been introduced. The claims remaining active in this application accordingly are claims 30-56. Reconsideration of this application and allowance of the pending claims are respectfully requested.

In the Office Action dated August 15, 2006, the Examiner rejected claims 1-29 provisionally on ground of non-statutory obviousness-type double patenting in view of claims 1-35 of co-pending application No. 10/784,727. Claim 1 is rejected under 35 USC 101 as claiming the same invention as that of claim 1 of the co-pending application.

Claims 1-29, cancelled, are replaced by claims 30-56 directed to various aspects of “synchronizing content in different languages,” the subject matter of which is considerably different from that of the co-pending application, claims 1-35 of which have been cancelled and replaced by claims 36-79 on “providing translated content.” As a reading of the claims in the current application and those of the co-pending application will demonstrate saliently the considerable difference in scope of claimed subject matter, the rejections predicated on double patenting are believed moot. Favorable reconsideration, and substantive examination of claims 30-56, are respectfully requested.

To the extent necessary, a petition for an extension of time under 37 C.F.R. 1.136 is hereby made. Please charge any shortage in fees due in connection with the filing of this paper, including extension of time fees, to Deposit Account 500417 and please credit any excess fees to such deposit account.

Respectfully submitted,

McDERMOTT WILL & EMERY LLP
